Welcome to the 15th International Conference on New Actuators and its accompanying exhibition. For nearly 30 years this is a unique biennial meeting place for international experts in the field of miniaturised actuators and drives. Always in June of the even years, while the soccer actors compete for the European or even the World championship, experts from science and industry meet here in Bremen to present and discuss the latest results or to show new products based on smart actuators.

Actors versus actuators? Attractive human muscles versus high-tech artificial muscles? This time there is no severe problem with the competing schedules, thus we can focus on the technical highlights without interruption.

In the comfortable atmosphere of the Bremen Exhibition and Congress Center the 450 experts from more than 30 countries find a comprehensive conference programme with 89 lectures and 49 poster contributions plus the accompanying "9th International Exhibition on Smart Actuators and Drive Systems" in the adjacent Hall 4.1.

But ACTUATOR is not only a brilliant place to present and discuss the latest results in the area of new actuators, it also an excellent place for networking within the worldwide experts' community present here, for creating visions for new inter-research co-operations or starting business co-operations with industrial partners. We are sure you will find excellent opportunities and competent candidates.

Of course, such an event cannot be realised without highly qualified partners. In this concern we thank all the members of the Programme Committee for their excellent work and valuable assistance in compiling the programme. Furthermore, we are particularly grateful to the endorsing institutions, the media partners and to all others who have supported our public relations work. And our special thanks go to all those participants who are actively contributing to this event by sharing the results of their research work here – as authors of papers and posters, or as exhibitors.

We hope you enjoy this interesting event with lots of stimulating discussions and inspirations, and, of course, a pleasant stay in the Hanseatic City of Bremen.

CeramTec
THE CERAMIC EXPERTS

Monday, 13 June 2016

Exhibition Forum I

09:40 – 10:00

New Compact, Dynamic, Precise Actuation Solutions from CEDRAT TECHNOLOGIES

F. Claeysen, CEDRAT TECHNOLOGIES S/A, Meylan, France

10:00 – 10:20

Xeryon, a Company Specialized in Custom Piezo Solutions

B. Kersschot, Xeryon bvba, Leuven, Belgium

Exhibition Forum II

15:10 – 15:30

Miniature Fiber-Based Interferometry in Position Control and Other Applications

U. Helfferrich, attocube systems AG, München, Germany

15:30 – 15:50

Fuse Actuator Stacks and High Temperature Actuator Stacks

C. Goueffon, Noliac A/S, Kvistgaard, Denmark

Tuesday, 14 June 2016

Exhibition Forum III

09:30 – 09:50

Industry 4.0 and Shape Memory Actuators – Opportunities and Challenges

R. Theiß, Zentrum für angewandte Formgedächtnistechnik (ZAF), Remscheid, Germany

09:50 – 10:10

Smart, Low Energy Actuators for the 21st Century

F. Schiere, The Smart Actuator Company (SACO), Malvern, United Kingdom

Exhibition Forum IV

14:30 – 14:50

New Piezo Resonant Motion Technology for Optomechanical Applications

C. Wolthaus, Thorlabs GmbH, München, Germany

14:50 – 15:10

The Broadest and Deepest Portfolio of Positioning Systems

J. Suske, Physik Instrumente (PI) GmbH & Co.KG, Karlsruhe, Germany

Wednesday, 15 June 2016

Exhibition Forum V

09:30 – 09:50

Funding Opportunities for Smart Materials Research within the EU Framework Programme Horizon 2020

E. Brockhaus, Forschungszentrum Jülich GmbH, Jülich, Germany

09:50 – 10:10

High Voltage for Actuators

W. Müller, hivolt.de GmbH, Hamburg, Germany

 www.attocube.com
 info@attocube.com

Stand C03

attocube is a leading supplier for nano precise motion and highly accurate interferometric sensor solutions. The portfolio includes linear, goniometric and rotational piezo stages, hexapods, and ultrasonic drives, all working with nanometer accuracy. The positioners are available for various environmental conditions, always optimized for the specific field of application. The fiber-based displacement sensor is the product of choice for challenging OEM and synchrotron applications. It offers sub-nanometer resolution and can be applied for highest precision measurements, vibration analysis and displacement detection

C

CEDRAT TECHNOLOGIES S/A

59, Chemin du Vieux Chêne, 38246 Meylan, France
 Tel.: +33 (0) 456 58 04 00
 Fax: +33 (0) 456 58 04 01

 Tel.: +49 (0) 9123 77 - 0
 Fax: +49 (0) 9123 77 - 515
 www.ceramtec.com/actuators
 multifunctional_ceramics@ceramtec.de

Stand D02

CeramTec GmbH is one of the largest international manufacturers of ceramics for technically demanding applications and amongst others also a specialist in piezoceramics. Piezoceramic actuators utilize the piezoelectric effect: A piezoceramic PZT material expands in the direction of the electrical field when voltage is applied to it. Thus, the piezoceramic actuator provides precise movement up to about 200µm, while exerting high forces for applications such as valve control and micro-positioning.

E

ETO MAGNETIC GmbH

 Tel.: +49 (0) 351 477 - 22320
 Fax: +49 (0) 351 477 - 22303
 www.fgl-netzwerk.de
 andrea.boehm@iwu.fraunhofer.de

Stand A01

Today shape memory alloys (SMAs) are not that well established in technical applications as for instance conventional structural materials. Therefore the network -Efficient added value in the manufacturing and application of shape memory alloys- was founded. Experts for material production, research and development as well as users of the SMA technology participate. Thus the network establishes a platform for companies which apply SMAs or are generally interested in this technology. Hence the main objective is the spacious establishment of the multi-functional material SMA with its outstanding properties and benefits. It is further aimed to connect the currently separated process steps in manufacturing, processing and adapting SMA-components. The network offers innovative proceedings, consulting services and new products using SMA to interested users of all sectors.

Stand B01

6 Fraunhofer institutes, being engaged in complementary research areas, cooperate within the Fraunhofer Adaptronics Alliance.

These partners work together in scientific as well as in industrial research projects, according to demand. Thus, interdisciplinary solutions can be found from one source. The partners' competencies cover the following areas:

- Materials and components
- Experimental system analysis
- Numerical and experimental simulation
- Electronics and control engineering
- Production and processing
- System design, evaluation and application

Stand A04

Johnson Matthey Piezo Products is a specialist for piezo bending actuators. We focus on development, production and sales of piezoceramic actuators, sensors, energy harvesting generators and ultrasonic atomizers as well as engineered piezoelectric systems and modules with electronics and mechanics for industry applications, textile machines, medical devices, automotive and other markets.

M

SENSOR MAGAZIN / LASER MAGAZIN

c/o Magazin Verlag Hightech Publications KG

Wincklerstraße 4, 31542 Bad Nenndorf, Germany
Tel.: +49 (0) 5723 5534
Fax: +49 (0) 5723 76212
www.magazin-verlag.de
kontakt@magazin-verlag.de

Stand B02

SENSOR MAGAZIN provides information to engineers and scientists who develop, manufacture and use sensors and actuators. The trade journal reports on the application of sensor and actuator technology in all branches of industry as well as in institutes and laboratories. The industry's latest technological developments are highlighted in the MAIN TOPIC of each issue. The journal focuses on practice-oriented articles under the headings of Practice, Market and Trade Fair Reports as well as Products. Future trends are reflected under the headings of Research, Innovations, Patents and Micro-Nano Integration. Exclusive interviews with key people from research and industry round off the spectrum of articles. The content, design and service meet the high requirements placed on a high-tech journal worth reading and promoting sales. www.sensormagazin.de

MECHATRONIK / I.G.T. Informationsgesellschaft Technik GmbH

Stand B02

Oskar-Maria-Graf-Ring 23, 81737 München, Germany

Fax: +49 (0) 8441 797611 - 4

www.mikroproduktion.de

info@mikroproduktion.de

Mikroproduktion is the German speaking special interest magazine for applied micro technology such as lithography, micro milling, micro laser processing, micro injection moulding, EDM, micro assembly and micro robotics, Nanotechnology, clean room technology and micro metrology. Mikroproduktion describes the whole process chain for the manufacturing of micro components, functional micro structures and micro systems. Main application fields can be found in micro optics, micro sensors and MEMS, micro fluidics and micro mechanics.

MSM Net

Stand D04

c/o ETO Magnetic GmbH

Hardtring 8, 78333 Stockach, Germany

Tel.: +49 (0) 7771 809 - 452

www.themsm.net

Magnetic Shape Memory (MSM) alloys are ferromagnetic materials that produce motion and force under moderate magnetic fields. The MSM Net is an international R&D alliance whose goal is to strengthen relationships between the partners and to promote and divulge the magnetic shape memory technology in the scientific and in the industrial realm and to enable its commercialization. The network currently consists of 7 members from Germany, Finland, and the US, including 2 companies and 5 research institutions.

Noliac A/S

Stand D01

Hejreskovvej 18, 3490 Kvistgaard, Denmark

Tel.: +45 (0) 49 12 50 30

Fax: +45 (0) 49 12 50 31

www.noliac.com

info@noliac.com

Noliac presents a unique proficiency in the field of piezoelectric technology. We design, develop and manufacture the total range of piezoelectric products from powders to mono- and multilayer components and all the way to finished plug-and-play applications.

At Actuator 2016, we will present two new piezoelectric actuators: Fuse actuator stacks and high temperature actuator stacks. The fuse actuator stacks are a unique solution for critical applications. The high temperature actuator stacks are ideal for high temperature applications, where you also need a high operating frequency.

P

Physik Instrumente (PI) GmbH & Co. KG

Stand D03

Auf der Römerstraße 1, 76228 Karlsruhe, Germany

Tel.: +49 (0) 721 4846 - 0

Fax: +49 (0) 721 4846 - 1409

www.pi.ws

info@pi.ws

Well-known for the high quality of its products, PI (Physik Instrumente) is one of the leading players in the global market for precision positioning technology for many years. PI has been developing and manufacturing standard and OEM products with piezo or motor drives for 40 years. In addition to four locations in Germany, the PI Group is represented internationally by fifteen sales and service subsidiaries.

PI Ceramic GmbH

Stand D03

 Fax: +44 (0) 91684 560977
 www.smartact.co.uk
 tony@smartact.co.uk

Stand C02

The Smart Actuator Company (SACO) was formed in 2011 to develop a new electric valve actuator by incorporating up to date computer and electronics technology in to the designs.

The first medium size actuator, delivering 40 to 100 Nm of programmable torque output was launched at the British Valve & Actuator Association (BVAA) Spring Conference in May 2014 and cost approximately £1 Million to Research, Develop, and Test. It incorporated many of the features only previously seen in actuators costing thousands of pounds more; such as failsafe, modulation and speed control.

In 2015 SACO won a €2.4 Million Horizon 2020 European Union Grant for a project to develop smaller and larger versions of the first medium product. They will deliver 0-40 Nm and 100-400 Nm of programmable torque output respectively. The large product will also be available as a 'Subsea' version which has already been tested down to 80 metres depth.

 www.xeryon.be
 steven.cappa@xeryon.be

Stand B03

Xeryon is specialised in the design, development and manufacture of piezo-electric actuation solutions. Our piezo motors are tailor-made to the needs of our clients who face the toughest challenges in precision applications. Xeryon's miniature XRT rotary stages position small samples with sub-micrometre error motion and very fine angular resolution. Our unique MultiDrive piezo motor technology combines the speed and unlimited stroke of a resonant motor with the extreme accuracy of a direct stroke actuator. Both modes of operation are simultaneously realised in a single motor, enabling coarse-fine positioning with one motor.
